DISPLAYS CONTINUE

Continuing in the Library are two first-floor displays: the Nathan M. Bisk College of Business Research Showcase and Complementarity: Growing Knowledge Together - Florida Tech and the U.S. Government. Just added to the research showcase is a QR code that leads to the exhibit’s online counterpart, found at http://lib.fit.edu/?app=librarydisplays&display=201102.

GPO CELEBRATES 150 YEARS OF SERVICE
by Deb Cook, Government Information Librarian

“The work of the GPO is so fundamental to our work that we frequently lose sight of all the services they actually provide. We like to say that all congressional information is on the Internet, but many of us don’t seem to know that it’s the GPO that puts that information online on its site, GPO Access, and now on the successor site, FDsys … Benjamin Franklin and the Founding Fathers would be surprised and pleased by what the GPO is and does today. On behalf of all of us in this House who daily rely and depend on the products and services the GPO provides, I say congratulations and best wishes to Public Printer Bill Boarman and the men and women of the United States Government Printing Office, and convey our thanks and deepest appreciation for all their hard work.”

Robert A. Brady (D- Pennsylvania)

Proudly and ably, Florida Tech's library has provided access to the GPO and a wide range of other government information since it became a federal depository library in 1963. Today we offer resources and services online, in print, and in several media formats, encouraging everyone to take full advantage of our rich collections of government information, both online and on the third floor.

FROM THE DEAN’S DESK: GREEN AT FLORIDA TECH

Green is not just a color anymore. Because of LEED (Leadership in Energy & Environmental Design), buildings are going green to qualify for an internationally recognized green building certification. Certification is verification that a building was designed, built, and performs to high standards of energy savings, water efficiency, CO₂ emissions reduction, improved indoor environmental quality, and stewardship of resources and sensitivity to their impacts. Please come to the “Green at Florida Tech” forum to learn about our leadership in “going green.” A reception will immediately follow, with environmentally conscious and many-colored treats.

We are looking forward to seeing you on Wednesday, April 6, at 3:00 p.m., in the Library's second-floor Link Multimedia Room.
