LIBRARY DISPLAYS

Continuing in the Evans Library are two popular displays.

*Edmund Skellings, Poet of Technology* features inspiring memorabilia of Dr. Edmund Skellings’ accomplishments.

*The College of Engineering Research Showcase* highlights the College’s signature research areas:
- Intelligent Systems
- Sustainability of the Environment
- Assured Information and Cyber Security
- Communication Systems and Signal Processing
- New Space Systems and Commercialization of Space

Visitors can also enjoy this exhibit online at [http://lib.fit.edu/library-displays/201110.php](http://lib.fit.edu/library-displays/201110.php).

BEYOND WORDS!

by guest writer Tiffany Farrar
Sophomore, Forensic Psychology

Whether you are a first-time college student or returning to college life after an eight-year hiatus (like me), Florida Tech can be rather intimidating. My first semester here was overwhelming and I was entering a major I knew little about, Forensic Psychology. Most people hear forensic and think “cool CSI stuff”; in reality, it is defined as a division of psychology that deals with “abnormal behavior and mental disorders as they relate to the legal system.” This definition is supplied by the *APA Dictionary of Psychology* (REF BF31 .A65 2007), a resource that was introduced to me during my COM 2012 class last fall. This dictionary is an incredible compilation of over 25,000 terms that explore the different concepts, processes, and therapies of psychology. This *APA* dictionary is must-see for any psychology major or graduate student. The next time you run across a term you are unsure of, or are in need a reliable reference for one of your many papers, stop by the first floor of the Evans Library and take a look at this amazing first edition.

WELCOME, NELLE ROBB AND LISA PETRILLO!

The Library welcomes Nelle Robb, Staff Librarian-Patron Access, and Lisa Petrillo, Instructional Programs Technician.

Nelle contributes to the Library’s Service Desk by supervising student employees, assisting patrons, and maintaining the collection. She earned her bachelor’s degree in Technology Education from University of West Florida. She comes to Florida Tech with library and teaching experience.

Lisa has joined the library’s instructional programs team. She received her bachelor’s in Interdisciplinary Studies from University of Central Florida. Her responsibilities include event planning and the design and production of instructional and promotional publications. She brings to Florida Tech administrative, desktop publishing, and public relations experience.

DATES ANNOUNCED

Registration has begun for the Library’s Summer 2012 graduate research workshop. To enroll in this half-day seminar on Friday afternoon, June 1, graduate students can pick up a form at the Service Desk or go to [http://lib.fit.edu/instruction/grw.php](http://lib.fit.edu/instruction/grw.php). Reservations are required by Tuesday, May 29.

FROM THE DEAN’S DESK: JULY ISU EVENT

The library looks forward to this summer’s International Space University (ISU) and its excellent open-to-the-public programming. On Friday, July 6, from 9 a.m. to noon in the Gleason Center, the ISU, KSC, and Florida Tech will co-sponsor a TEDx event, which will highlight how space initiatives can improve our lives down here. For more information on helping to sponsor our campus’s fantastic TEDx event, contact Delilah Caballero (dcaballe@fit.edu). See you there!
