1.2 F.I.T.'s Computer Network

Presently, the computer network that exists at F.I.T. is comprised of one gateway machine and many host machines. A schematic of this network is shown in Figure 1 below. Please note that the host names for the VAX 11/780, VAX 8200, MicroVAX, and HCX-9 computers are in parentheses. Also, the host names for the Sun clients are as shown. Moreover, listed adjacent to each Sun host are the name of the person to whom a Sun client has been assigned and the physical location of each Sun client.
